

## Choose a Location...

What makes the Safer® Brand Stink Bug Magnet so effective is that you can trap stink bugs in all life cycles, depending upon placement.

## To Attract and Trap Adult Stink Bugs...

Hang the trap onto a tree branch, overhang, or other area high off of the ground.

## To Attract and Trap Nymph Stink Bugs

Place trap on the ground in your garden. Nymph stink bugs do not fly so placing trap directly on the ground enables the nymphs to crawl into the trap.

## Trap Assembly...

The Safer® Brand Stink Bug Magnet comes fully assembled but requires pheromone to be placed inside trap to activate..

## Insert Pheromone Tab...

1. Remove the clear plastic top to the trap, simply by separating the plastic top from the base.
2. Open the pheromone packet and remove pheromone from protective packet.
3. Place pheromone in the the ridge shown in the Fig. 1 and Fig. 2 below.

Fig. 1

Fig. 2

4. Place the clear plastic top back onto the trap and place trap in desired location to trap stink bugs.

## Empty Trap...

1. Turn Trap upside down, preventing the stink bugs from escaping or falling out of the trap.
2. Remove clear plastic top and discard stink bugs, the trap has caught.
3. Using both thumbs, remove 'cone' top to discard remainder of stink bugs caught in the trap, as illustrated in Fig. 3 below.

Fig. 3

4. Replace pheromone prior to trap reassembly.

## For Best Results...

- Place trap on the soil in your garden to attract the nymph stink bugs.
- Replace pheromone every 4-6 weeks as pheromone will lose effectiveness over time

**Replacement pheromone packets are available at [www.saferbrand.com](http://www.saferbrand.com)**

## Warranty

The Stink Bug Magnet is warranted to be free from defects in the material and workmanship under normal use for a period of 1 year from the date of purchase. Contact customer service at 1-800-800-1819.
